# MINI POWER BANK 10000mAh

## User Manual

Recharging the power bank

When you press the button and the LED indicator is not lit, it means you need to recharge your power bank.

1. Use the charging cable to connect your power bank to the computer for recharging. The LED light will flash.When the power bank is fully charged the LED light will be constantly on.
2. Use the power adapter to recharge the power bank. Connect the power bank to the DC 5V power adapter to start charging. The LED light will flash. When the power bank is fully charged the LED light will be constantly on.

Recharging your device

Select the corresponding charging cable and connect it to your device. The power bank comes with integrated Lightning, Type-C, and micro USB cables and two USB output ports for universal compatibility.

Maintenance of the power bank

1. Please keep the product dry - rain, moisture and liquids can damage the power bank.
2. Do not use the product in excessive heat, or leave it at high temperature. Keep your power bank away from extremely high or low temperatures and other heat sources.
3. Do not drop or knock your power bank. Incautious handling can damage internal circuit boards.
4. Do not attempt to disassemble the power bank.

Precautions

1. Please ensure the power bank is fully charged before the first use.
2. Please ensure that the charging connector is inserted correctly when charging your device.
3. If the blue light indicator goes out during the charging process it means that the power bank battery needs to be recharged.
4. When your device is fully charged, remove the output cable to avoid unnecessary power loss.

Security features

This power bank features multiple protection protocols to ensure safe charging: it provides overcharge, discharge and short circuit protection.
The DC 5V output with international standard makes this power bank compatible with most USB powered devices, regardless of the brand.
