Charging

The product comes with the built-in rechargeable battery. Please recharge the battery before first use.

- Insert the charging cable into the charging port
- The charging process last approximately two hours
- During the charging process the red status indicator is always on. It will turn off when the device is fully charged
- You can play music while the device is recharging
- When the battery is low the corresponding mode status indicator flashes slowly

Functions

To turn the device on, shortly press the button, and the blue light indicator will flash.

To turn it off, press and hold the button for about 5s.

After 10 minutes of being disconnected, the device will enter power saving mode.

1. Receiver mode:

- Turn on the device. The blue Bluetooth status indicator will flash rapidly. Insert the 3.5mm AUX cable into the corresponding output (black audio output). The receive status light will be constantly on. Plug in the other side of the cable into your audio equipment. After the successful connection the blue indicator light will flash slowly.

2. Transmitter mode:

- Turn on the device. The blue Bluetooth status indicator will flash rapidly. Insert the 3.5mm AUX cable into the corresponding output (red audio output). The

receive status light will be constantly on. Plug in the other side of the cable into your audio equipment (smartphone, tablet, PC, MP3). Press the multifunctional key shortly, and the device will enter the Bluetooth pairing state. Please place this device and the other device within the 10 metre range. After the successful connection the blue indicator light will flash slowly. If you want to change the device, press the button to switch to the next Bluetooth device.

Troubleshooting

1. The device doesn't work properly.
 - Check if the power is on.
 - Plug in the charger to check if the battery is recharged.
 - Turn it off then turn it on again.
 - The device will play music from the Bluetooth device that has been paired and found first. Please unpair any unused devices.
 - Choose the working mode by referring to the indicator light. If the cable is plugged into both jacks, the product will enter the default receive mode.
 - Please check if the cable is plugged into correct audio jack
 - If it cannot be connected to a Bluetooth device, bring the receiver a little closer
