- Wireless charging output: 5W/7.5W/10W/15W
- Airpods charging output: 5W
- Apple watch charging output: 3W
- USB output
- Input: 5V/4A, 9V/4A

LED charging indicator

When you switch the charging station on, LED light charging indicator may appear in three colors:

- Red: the charging station has entered the standby mode.
- Green: smartphone wireless charging is in process. When the phone is fully charged, the green light will turn off.
- Blue: AirPods charging is in process. When the phone is fully charged, the blue light will turn off.

- Flashing light: there are few possible reasons - smartphone detection is in process, AirPods are not properly aligned, or there's a foreign object in between.

Safety instructions

- Please keep your charging station dry and away from water or any liquid.
- Do not use the product in excessive heat, or leave it at high temperature. Keep your charging station away from extremely high or low temperatures and other heat sources.
- Please void environments with high humidity to avoid corrosion, short circuit or leakage.
