

**WATER-RESISTANT SOLAR POWER BANK WITH WIRELESS
CHARGER - 30000MAH**

User Manual

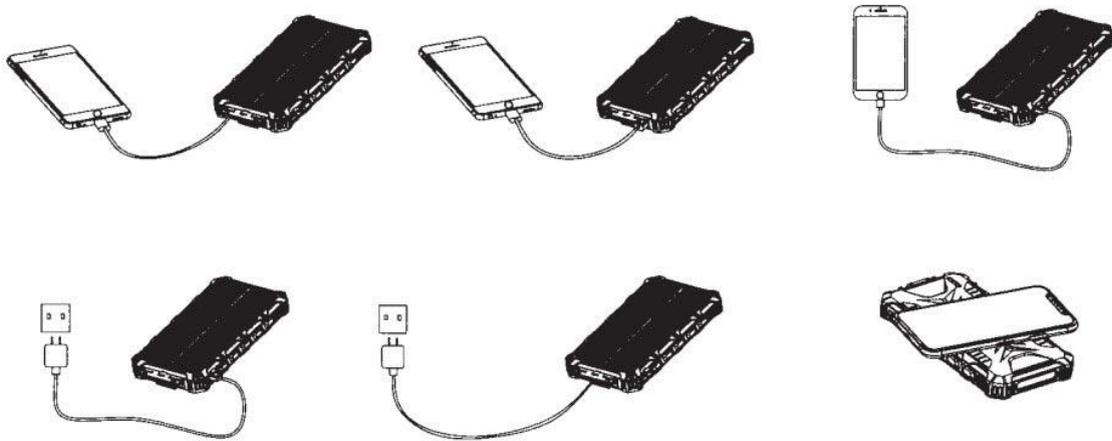

Product overview

1. USB-A outputs (DC 5V, 3A Max)
2. MicroUSB input (DC 5V, 2A Max)
3. Type-C output/input (DC 5V, 3A Max)
4. LED power indicator
5. Solar charging indicator
6. Power button
7. Solar panel
8. Wireless charging

Operating instructions

To recharge the power bank via the solar panel, please put the power bank in direct sunlight and make sure the solar panel is positioned towards the sun. The solar charging indicator will turn green while the charging is in process, and turn blue when the power bank is fully charged.

Note: the solar panel should be used only for emergency charging. It should not be the primary source of charging as prolonged exposure to sun can cause damage to power bank.

MicroUSB / Type-C power bank charging: connect the power bank to the power cable using micro USB or USB-C cable, then connect it to the power source. The charging will start automatically. Use a charger with output voltage between 5V and 5.5V.

Note: this power bank will not charge your device via the Type-C output while being charged, since the MicroUSB and Type-C cannot work at the same time.

LED status indicators guide:

- 100% (fully charged power bank): all four LEDs are on (solid blue color)
- 75% - 99%: three LEDs are on, one is flashing
- 50% - 75%: two LEDs are on, one is flashing
- 25% - 50%: one LED is on, one is flashing
- 0% - 25%: one LED is flashing

Recharge your devices via this power bank by connecting it to the power bank with the corresponding cable. The charging will start automatically. The power bank will turn off automatically after 35s when there's no device connected.

If you want to recharge multiple devices simultaneously, the power bank must be fully charged.

LED flashlight operating instructions

1. Double press the power button to turn on the LED flashlight
2. To turn on the Warning light mode turn on the flashlight, then press the power button once
3. To enter the SOS light mode, turn on the flashlight, press the power button once and then once again
