

PC Android Endoscope / Inspection Camera - microUSB, IP67

It only works with phones of Android system, does not support IOS system; and your phone must support OTG function, and must support connecting with the external camera(UVC).

Scan QR code using your phone browser to download it.

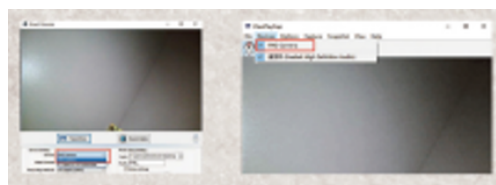

Pls note: VIVO, OPPO phones need to open the OTG function.
The activation method can be obtained from Google.

Note: if there is an error message, your phone can't support the endoscope. You need to make sure your phone must have the OTG and UVC function.

How to Connect it with Your PC System

1. Open the link download it on PC, then install the software:
<http://www.jendoscope.cn/pc>
2. Then connect the usb endoscope by PC usb2.0 interface, then choose the device "USB Camera", you can take pictures and videos.

How to use it on MAC

MacBook OS, please use "Photo Booth", "QuickTime Player" "VLC [VideoLan Client]" software.
