Specifications

- Screen size: 12"
- Battery: 2000mAh
- Charging time: up to 3h
- Dimensions: 26 x 15,5 x 4cm

How to use

Press and hold the Switch button for 3 seconds to enter the Bluetooth pairing mode. Turn on the Bluetooth on your smartphone and search for VRPlayers device. Tap to pair the devices and that's it. If you get a phone call while paired, Bluetooth will be disconnected to restore the normal use of the smartphone.

If the indicator light is flashing, it means that the Bluetooth is on and not connected. If the indicator light is on, it means that Bluetooth is paired. While charging, the indicator light is always on and it will turn off when the charging is complete.

There are 3 charging methods. You can use the microUSB charging cable to charge it directly through the Speaker charging interface, or the 18650 rechargeable batteries, or use the 5V 2A charging adapter and charge it through the Mobile charging output.

For the best viewing experience set the highest brightness on your smartphone.
