Realme Link app

To connect the smartwatch to your smartphone, you'll have to download the required app. To do so, search the Google Play Store for Android and App Store for iOS and download the Realme Link app. Turn on the Bluetooth on your phone, open the Realme Link app, and register the account and complete the profile information like gender, birthday, height, weight, name, etc. After that select the Realme Watch to scan the nearby devices, and choose and connect to your Realme Watch. Click Confirm to pair the watch and your phone. If all is done correctly, the display will show Binding Success, and if the pairing is not ok, the display will show Binding Failure. If this happens, try again to pair your devices.

Keep the touch button facing upwards and make sure the bottom sensor is clung to the skin. Keep the wristband 2cm or more from the wrist.

When the battery is less than 10%, the watch will vibrate once and display the below symbol, please select the mode you want. Click to turn on Power Saving Mode, and press and hold the side button for 5 seconds to exit. Please charge the watch immediately if the battery power is lower than 3%.
