Operating instructions

First of all, you need to connect the GPS navigation to the power source. Plug the included car charger into the cigarette lighter socket and the cable into the GPS device. Press the Power button on the upper left side of the device and it will power on. After powering on, the GPS navigation device will enter the main screen.

The FM function transmits the radio FM frequencies

The setting function allows you to adjust the time, sound, navigation, battery management, and more.

The GPS function opens the navigation maps.

The BT function allows you to connect your Bluetooth-enabled device. The default connection password is 0000.

The Nema function shows GPS information.
