Download App:

1. Use your mobile phone to scan the QR code below or search for "WFIT" to download and install the APP

Note:

1. For a better user experience, please follow the prompts to upgrade the APP to the latest version in time.
2. The system requirements are Android 5.0 or iOS 10.0 and above.

Pairing:

1. Open the app on the mobile phone, complete the information setup, and choose to always allow and agree according to the permission prompt.
2. Click to add a watch on the APP device interface, search for the device model F12 and click Connect. After the APP interface displays "Connected", the phone will pop up a window "Whether to accept the Bluetooth pairing request of F12 Audio", click "pairing" to establish the Bluetooth connection.
3. After the APP Bluetooth connection and binding are successful, the watch time display should be correct, and the APP interface will display that the device model F12 has been connected. If the color is gray, it means that the connection was not successful, please try again.
4. After the call Bluetooth connection is successful, the Bluetooth interface in the phone settings, the paired device/my device will display that F12 Audio has been connected. If the call Bluetooth is not connected successfully, please reopen the phone settings interface, in the phone settings Reconnect and pair F12 Audio in the Bluetooth interface.

Charging:

This watch features magnetic charging. Please use the standard charging adapter for charging. Align the charging port with the metal contact on the charger until the charging level indicator appears on the watch screen.

Connect the USB interface to a mobile phone charger with an output current above 1A or a computer USB interface for charging
